Github: <https://github.com/viceversa1024>

Summary

Motivated student working on building the field of AI safety and creating the best possible world using new technology. I'm especially interested in communicating to the public, balancing epistemic rigor with cultural context, and between community members, bridging social gaps to accelerate high-quality research and development.

Skills

Operations: Visual, spoken, and written communication, composition, Photoshop workflow, multimodal design

Technical: Python (Numpy and PyTorch), React, Tailwind CSS, HTML/CSS, responsive design, AWS (DynamoDB, S3), cloud hosting configuration, git

Interests: Writing, meditation, complex systems, hosting community-building events among creatives

Experience

Board

Dec 2025-Present

AI Safety UCI

Created club website, helped organize research incubator, organizing retreat for Southern Californian AI alignment field-builders

Education

University of California, Irvine

Expected grad: June 2027

Applied and Computational Mathematics BS.

Relevant coursework: Linear Algebra, Statistics, Differential Equations, Multivariable Calculus, Technical Writing
