

Harry Waterman

watermah@uci.edu | Irvine, California

[Website](#) | [Github](#)

Summary

AI safety communicator and field-builder developing clear, coherent models of AI risk for public audiences. Background in applied mathematics and university-level operations, with experience organizing fellowships, student outreach, and community efforts.

Skills

Operations: Event organizing, fellowship coordination, community building, responsive web design

Technical: Linux, Git, Python (ARENA Ch. 0 fundamentals), TensorFlow, HTML/CSS, AWS (DynamoDB, S3)

Communications: Writing, editing, public-facing AI safety content, visual design in Figma and Inkscape

Experience

Co-director | AI Safety UCI

Sept 2025-Present

- Succeeding founding president; leading student outreach, partnerships, and long-term organizational direction
- Organizing our Technical Intro Fellowship for 30+ new students each quarter. Managing logistics, curriculum design, and facilitator recruitment.
- Designed and hosted the group website from scratch: aisafetyuci.com

Events Associate | Effective Altruism UCI

June 2024–March 2025

- Helped organize the EA UCI × UCLA retreat

Freelance Developer | The Hirschhorn, Next Exit AI

Jan–March 2025

- Built serverless backend for thehirschhorn.com: AWS Lambda (Python), S3 object storage, Cognito JWT authentication, and presigned URL image uploads
- Developed branding and UI/UX for nextexit.ai

Camp Counselor | Berkeley Day Camp

Summers 2021–2022

- I turned an initially disorganized aftercare effort into a well-defined program, and led three co-workers to continue it after my departure. Excellent reputation among campers.

Programs & Training

AGI Strategy Course | BlueDot Impact

March 2026

- Completed structured curriculum on AI governance, strategy, and the landscape of existential risk from advanced AI

AISST/MAIA Technical Workshop | AISST

March 2026

- Selected participant in a competitive technical AI safety workshop at Essex Woods Retreat Center

Action Potential Retreat | Kairos AI Project

March 2026

- Selected participant in a retreat focused on building and scaling AI safety groups at universities

Education

University of California, Irvine

Expected grad: June 2027

Applied and Computational Mathematics BS.

Relevant coursework: Linear Algebra, Probability, Statistics, Differential Equations, Multivariable Calculus, Technical Writing
